Connect API

Full details of updates scheduled for 30.11.2019

Connect API

Changes to the /Access/Countries Endpoint

From the 30th November 2019, the endpoint https://connect.creditsafe.com/v1/access/countries is changing its response structure and will require you to update your integration if you consume it.

Service Names

The top-level Services returned by Access/Countries will be modified to have spaces removed from the Service Name. This is so that the JSON structure can be handled and interpreted more easily.

- "Creditsafe Connect Online Reports" -> "creditsafeConnectOnlineReports"

New Fields

The following fields have been added to the response:

Field Name	Location	Description
Start Date	countryAccess.service.startDate	The date the service access is valid from.
Expire Date	countryAccess.service.expireDate	The date the service access will expire.
Paid	countryAccess.service.paid	The quantity of the service you have access to.

Change to Existing Response

The Access/Countries response currently returns each Service (Individual Monitoring Countries) you have access to, this is changing to show if you have access to Domestic or International Monitoring Services instead. This is to be more in line with the charging model of our Web Monitoring product.

You will not lose any access to countries in your Monitoring subscription.

- Field countryName is being replaced by "name" for Monitoring Services.
- Field iso2CountryCode is being removed from Monitoring Services.

Old Response:

```
"Creditsafe Connect Monitoring": [
        {
          "countryName": "Belgium",
          "countryIso2": "BE",
          "used": 0
        },
        {
          "countryName": "Germany",
          "countryIso2": "DE",
          "used": 0
        },
        {
          "countryName": "France",
          "countryIso2": "FR",
          "used": 0
        },
        {
          "countryName": "Ireland",
          "countryIso2": "IE",
          "used": 0
    ]
  }
],
```

New Response:

```
"creditsafeConnectMonitoring": [

    {

      "name": "Domestic Monitoring Exports",

      "startDate": "2019-10-22T00:00:00",

      "expireDate": "2020-10-22T23:59:59",

      "paid": 500,

      "used": 0

    },

    {

      "name": "Domestic Monitoring Alerts",

      "startDate": "2019-10-22T00:00:00",

      "expireDate": "2020-10-22T23:59:59",

      "paid": 500,

      "used": 0

    },

    {

      "name": "Domestic Monitoring",

      "startDate": "2019-10-22T00:00:00",

      "expireDate": "2020-10-22T23:59:59",

      "paid": 500,

      "used": 7

    },

    {

      "name": "International Monitoring",

      "startDate": "2019-10-25T00:00:00",

      "expireDate": "2020-10-25T23:59:59",

      "paid": 1500,

      "used": 28

    },

…

    ]
```

Connect Id alignment

There will be a push to align the Connect ids across the Connect API with the first alignment change happening on the Company report response. All Countries (except US) will have the second companyId property changed so it is in line with the first companyId property in the response. The format will change so it will only be a Country Code and the '001 will be removed (i.e. *GB001-* becomes *GB-*). The update of the *report.companyId* property value will be carried out in batches (7-10 Countries updated per day) from the 30th November.

before

```
    "orderId": "N/A",
    "companyId": "GB-0-00030209",
    "dateOfOrder": "2019-11-07T15:05:10.450Z",
    "language": "en",
    "userId": "1000467752",
    "chargeRef": null,
    "report": {
        "companyId": "GB001-0-00030209",
        "language": "EN",
```

after

```
    "orderId": "N/A",
    "companyId": "GB-0-00030209",
    "dateOfOrder": "2019-11-07T15:05:10.450Z",
    "language": "en",
    "userId": "1000467752",
    "chargeRef": null,
    "report": {
        "companyId": "GB-0-00030209",
        "language": "EN",
```
