}
}
}
}
```

VAT(RSIN Number) Number Search Enabling for NL

Live Now

Endpoints Affected:

https://connect.creditsafe.com/v1/companies/searchcriteria?countries=NL

https://connect.creditsafe.com/v1/companies?countries=SE&vatNo={number}

We have also added the Vat Number (RSIN Number) on the Company search response for NL Companies. An example of the response containing the vatNo property is below:

```
{
"id": "NL-X-330114330000",
"country": "NL",
"regNo": "330114330000",
"vatNo": [
"001631457"
],
"safeNo": "NL01943133",
"name": "Heineken N.V.",
…
}
```

New Land Registry endpoint

Live Now

A new endpoint has been made available:

https://connect.creditsafe.com/v1/localSolutions/GB/landRegistry/{companyId}
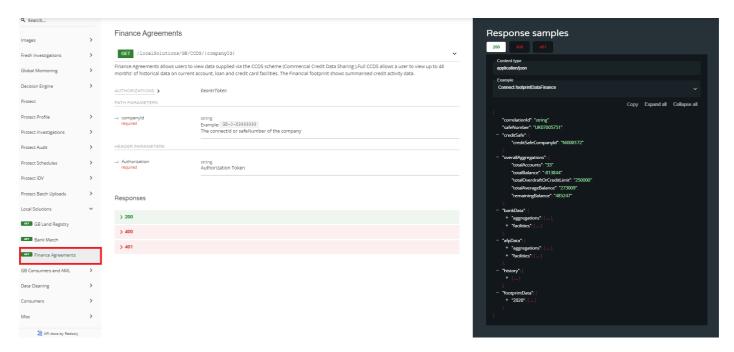

![creditsafe]

CCDS

Live Now

CCDS has been changed to 'Finance Agreements':

The endpoint has been split into two possible responses:
- Full Finance Data
- Footprint Data

The response will be dependent on the what the user has paid for and will be reflected in the API token used to authorise the call.

Fresh Investigations

Live Now

Seven endpoints have been exposed via Connect:

DELETE: /freshinvestigations/{orderId}

PATCH: /freshinvestigations/{orderId}

POST: /freshinvestigations/{orderId}/attachments

GET: /freshinvestigations/{orderId}/attachments

GET: /freshinvestigations/{orderId}/attachments/{id}

POST: /freshinvestigations/{orderId}/comments

GET: /freshinvestigations/{orderId}/comments

Authenticate

Live Now

Additional information has been added to the 'Authenticate' Tag.

Rate Limiting has been applied to the authenticate Connect process and details around the responses have been added.

Authenticate

Supply username and password to generate Authentication Token.

Rate Limiting Authenticate

Rate limiting has been made active on the authenticate endpoint. The following basis makes up the rate limiting which will need to be accounted for:

- 5 of the same invalid requests are allowed within 2 minutes.
- After 5 invalid requests, customer will get 429 HTTP Status for the same request.
- After 2 minutes, you can re-call the endpoint and will get 401s (as the credentials are invalid).
