Using Check & Decide

In the Check & Decide Search, type in the name of the business you are searching for. Selecting the business you are looking for will direct you to the Check & Decide Company Summary page.

The screenshot shows the Creditsafe interface with the 'Check & Decide' section selected in the sidebar. The main content area displays the company summary for CREDITSAFE BUSINESS SOLUTIONS LIMITED, which is marked as 'Monitored' with ID UK03490298.

Key Information:

- Company Number: 03836192
- Company Name: CREDITSAFE BUSINESS SOLUTIONS LIMITED
- Company Status: Active - Accounts Filed
- Incorporation Date: 31/08/1999
- Company Type: Private limited with Share Capital
- VAT Number: GB420950616
- SIC07: 82990
- SIC07 Description: Other business support service activities n.e.c.

Contact Information:

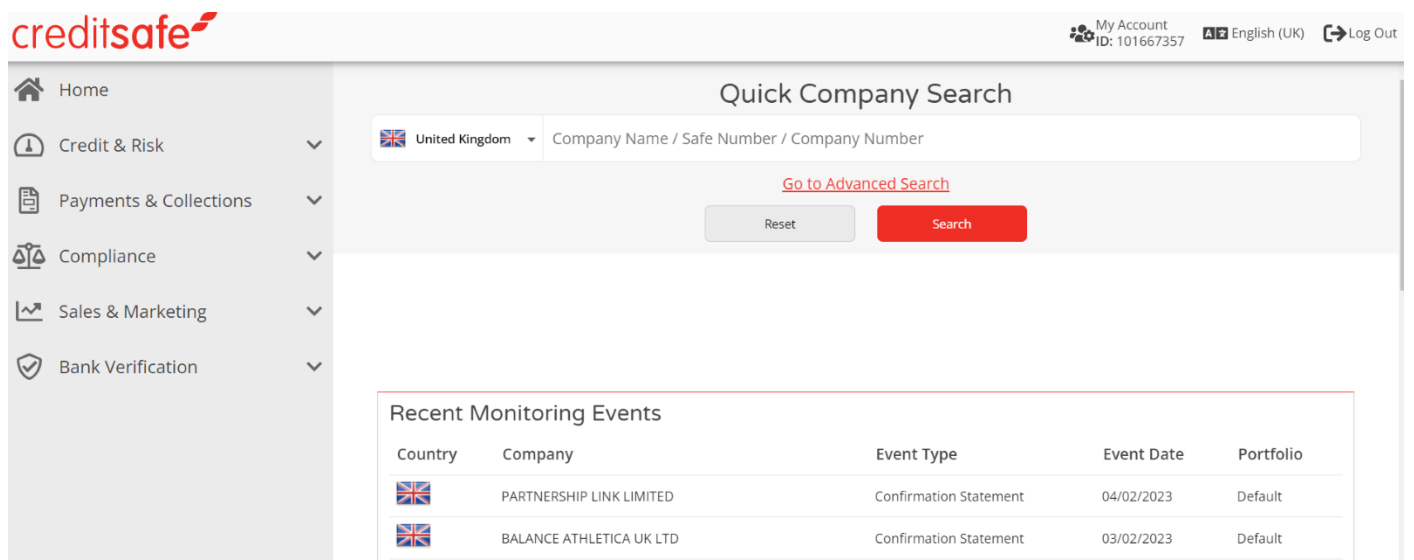

- Address: BRYN HOUSE, CAERPHILLY BUSINESS PARK, CAERPHILLY, CF83 3GR. [view on map](#)
- Website: www.creditsafe.com
- Phone Number: 02920886500

Decision Details:

Please enter the decision details below and then click "Request Decision".

Decision Tree:

Alternatively, from the Home section you can search for a Company using the Quick Company Search. Selecting the chosen company from the search results will direct you to the Company Report.

The screenshot shows the Creditsafe interface with the 'Quick Company Search' section. The sidebar includes 'Home', 'Credit & Risk', 'Payments & Collections', 'Compliance', 'Sales & Marketing', and 'Bank Verification'. The main content area features a search bar with a dropdown for 'United Kingdom' and a text input for 'Company Name / Safe Number / Company Number'. Below the search bar are 'Reset' and 'Search' buttons, and a link to 'Go to Advanced Search'.

Recent Monitoring Events:

Country	Company	Event Type	Event Date	Portfolio
	PARTNERSHIP LINK LIMITED	Confirmation Statement	04/02/2023	Default
	BALANCE ATHLETICA UK LTD	Confirmation Statement	03/02/2023	Default

From the Company Report, select the More Actions button and then select Check & Decide.

The screenshot shows the Creditsafe Business Solutions Limited company report. The page includes a sidebar with navigation options like Home, Credit & Risk, Company Search, Director Search, Consumer Search, Monitoring, Fresh Investigation, and Check & Decide. The main content area displays various metrics for the company, including Risk Score (95), International Score (A), Credit Limit (£2,150,000), Contract Limit (£15,500,000), Status (Active), DBT (32.23), Industry DBT (17), and Compliance Alerts (No Alerts). A 'More Actions' dropdown menu is open, showing options like 'Check & Decide'.

This will take you to the Check & Decide Company Summary page, which can be found [here](#).

Decision Trees

Scroll down to the Decision Details section. You will see a field named Decision Tree. A decision tree is an automated set of data checks that are performed to generate a decision. Decision trees can be designed using our Decision Templates or they can be a bespoke design and development. You can create as many decision trees as is needed for your business. You can grant Users access to one or more trees. The dropdown menu to the right will display a list of all the available decision trees you have access to.

Decision Details

Please enter the decision details below and then click "Request Decision".

Changing the Outcome of Referred or Pending Decisions

Manual Approval allows Users to change the Outcome of Referred or Pending Decisions

The manual approval feature allows an authorised user to change the results of a decision that is in a 'Refer' or 'Pending' (dependent on decision tree specifics and language) state. These states are called Status 2 decision states.

The manual Approval functionality will allow UPP Users or Connect API Users to change the status of a decision from 'Pending' or 'Refer' etc to either a Positive/Accept or Negative/Reject (the value of these states depend on the rules of the tree_in question).

When a User changes the decision outcome, they have the option to leave notes explaining the change. This is useful for a comprehensive audit trail.

Who can use Manual Approval

All users who have a role for the relevant tree except users with only the 'Basic Role' can change Status 2 decisions (refer or pending).

'Senior' Users can change decision outcomes for all decisions made by their 'users' (within their own business) on their own trees.

'Admin' Users can change decision outcomes for all users (regardless of business) for the given decision tree (at the moment this is limited to CreditSafe staff for support purposes).

How to override a decision

As you can see from the image below, if you have the right permissions and a decision comes back in status 2 you can “Approve Decision” or “Reject Decision” and leave some notes using the “Add note” feature:

The screenshot shows the Creditsafe interface for a company named "CREDITSAFE BUSINESS SOLUTIONS LIMITED". The "Decision" section shows an outcome of "Refer" with a warning icon and the message "Credit limit is less than Sales Order value". Below this, there is a text area labeled "Add a decision note here" and three buttons: "Approve Decision" (green), "Add Note" (grey), and "Reject Decision" (red). A green box highlights the text area and the buttons.

Adding a Note when changing a decision

A user can add as many notes as they wish BEFORE they change the outcome:

The screenshot shows the Creditsafe interface for the same company. The "Decision" section shows the same outcome of "Refer" with the same warning message. Below the text area, the "Add Note" button is highlighted with a blue circle containing the number 1, indicating that a note can be added before changing the outcome.

1. Enter text in the box
2. Click 'Add Note'

This will save the note and then display a table showing all notes for this decision:

The screenshot displays the Creditsafe web application interface. The top navigation bar includes the Creditsafe logo, a language selector (English), and a user profile icon. The left sidebar contains a menu with various search and analysis tools. The main content area is divided into several sections:

- Key Information:** Displays company details for CREDITSAFE BUSINESS SOLUTIONS LIMITED, including its company number, status, incorporation date, type, VAT number, SIC code, and description.
- Contact Information:** Provides the company's address, website, and phone number.
- Decision Details:** A section for entering decision details, including a decision tree, sales value, and a 'Request Decision' button.
- Decision:** A section showing the decision outcome (Refer) and associated rule information.
- Decision Updates:** A table showing updates to the decision, with columns for User, Decision, Notes, and Update Date. A green box highlights this table.
- Add a Decision Note Here:** A text input field for adding new notes, with an 'Add Note' button.

If there is no text to add, the Add Note button will not function.

You can repeat 'adding a note' as many times as necessary to convey information and capture working processes or audit information.

Changing a Decision Outcome

Users will be able to change the decision outcome to either a positive or negative, in this example we have 'Approve Decision' and 'Reject Decision' as options:

Decision

Outcome

Refer

Credit Limit is Less Than Sales/Order Value

Add a decision note here

1

2

Approve Decision

Add Note

3

Reject Decision

Rule Name	Audit Description
Credit Limit	£1,800,000.00
Credit Score Description	Very Low Risk

1. Add a note about the decision (this is not mandatory)
2. Choose to Approve the decision or
3. Choose to Reject the decision

These actions will save the note to the decision (as above) and change the outcome of the decision to reflect the choice made:

New Check & Decide Request

Rows per page: 10

1-10 of 1,717

Editing a decision from the history screen

Users with the correct permission will be able to expand an editable decision and then edit it in the same way as from the Decision Screen shown earlier:

1. Expand an editable decision by clicking the 'pencil' or the down arrow
2. Type a note
3. Save the note
4. Accept the Decision or
5. Reject the Decision

The screenshot displays the Creditsafe web application interface. On the left is a sidebar with various navigation icons and labels. The main area shows a table of decision history. One decision is selected and expanded, revealing its details. At the bottom, there are buttons for interacting with the decision, including adding a note, approving, or rejecting it. Numbered callouts (1-5) highlight the specific actions mentioned in the list above.

Carrying out these actions will change the status of a decision and display the related changes in a table:

Decision

Outcome: **Manually Approved**

Original Decision: Refer (08/15/2022)

Decision Updates:

Credit Limit	£1,800,000.00
Credit Score Description	Very Low Risk

User Permissions

Access to Check & Decide Decision Trees is managed by "Roles". Roles are used to define the level of access that a user has. In this section, we will explain the different roles available, and the access levels associated with each role.

Roles:

There are two roles available, each with its own set of permissions. The following is a list of the available roles:

- **Basic Access:** This role is designed for users who require basic access to Check & Decide. Users with this role can run decisions and view their own decision history.
- **Senior Access:** This role is designed for users who require more advanced access to Check & Decide. Users with this role can run decisions, view the entire decision tree history irrespective of which user ran the decision. They can also change the outcome of a decision using the manually approve or reject.

Managing Roles:

If you want to change a user(s) role, you will need to contact your local Creditsafe Account Manager.

Important Note:

It is important to ensure that users are assigned the appropriate role based on their level of access requirements. Assigning the wrong role can result in unauthorized access to sensitive information or the inability to perform necessary tasks.

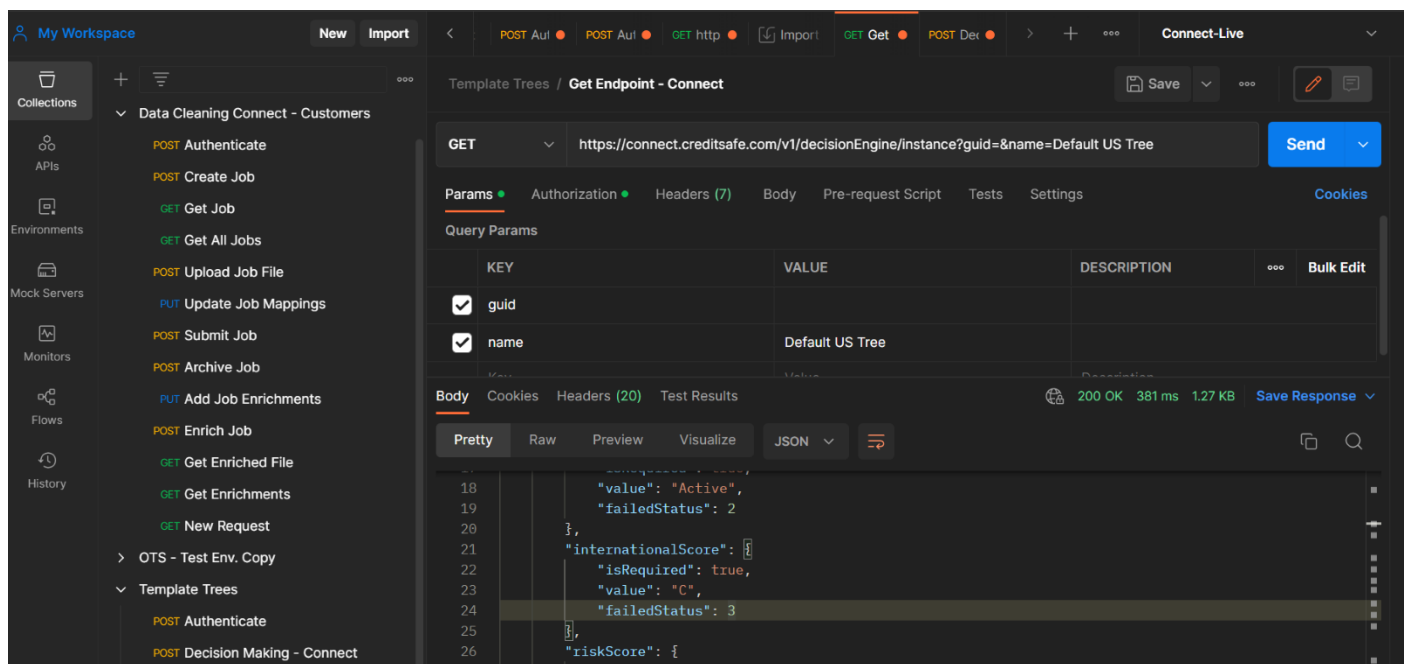

Using the API

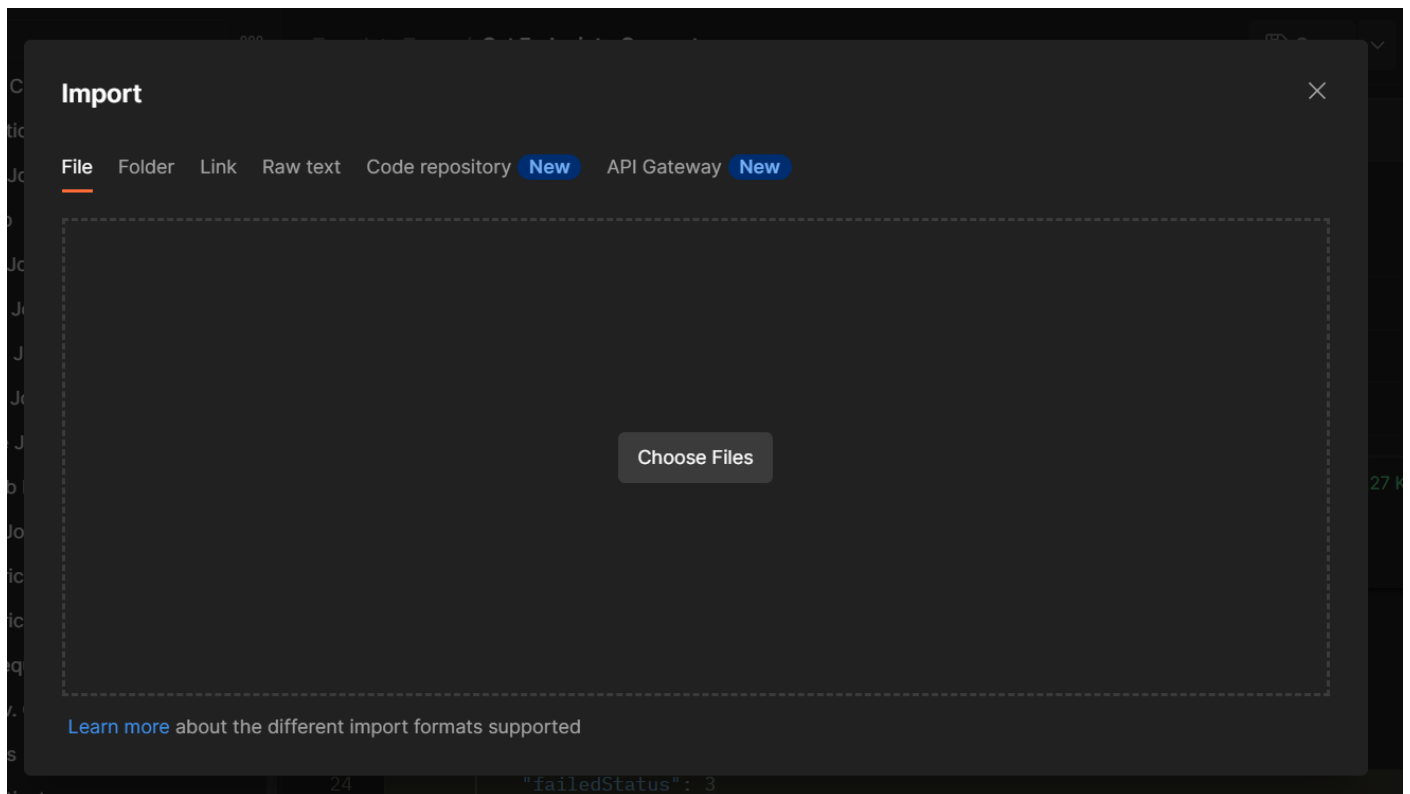

Import the Postman Collection to be able to fetch your instance and request a decision.

IMPORTANT: Please make sure your Postman Environment is setup with Globals and Locals.

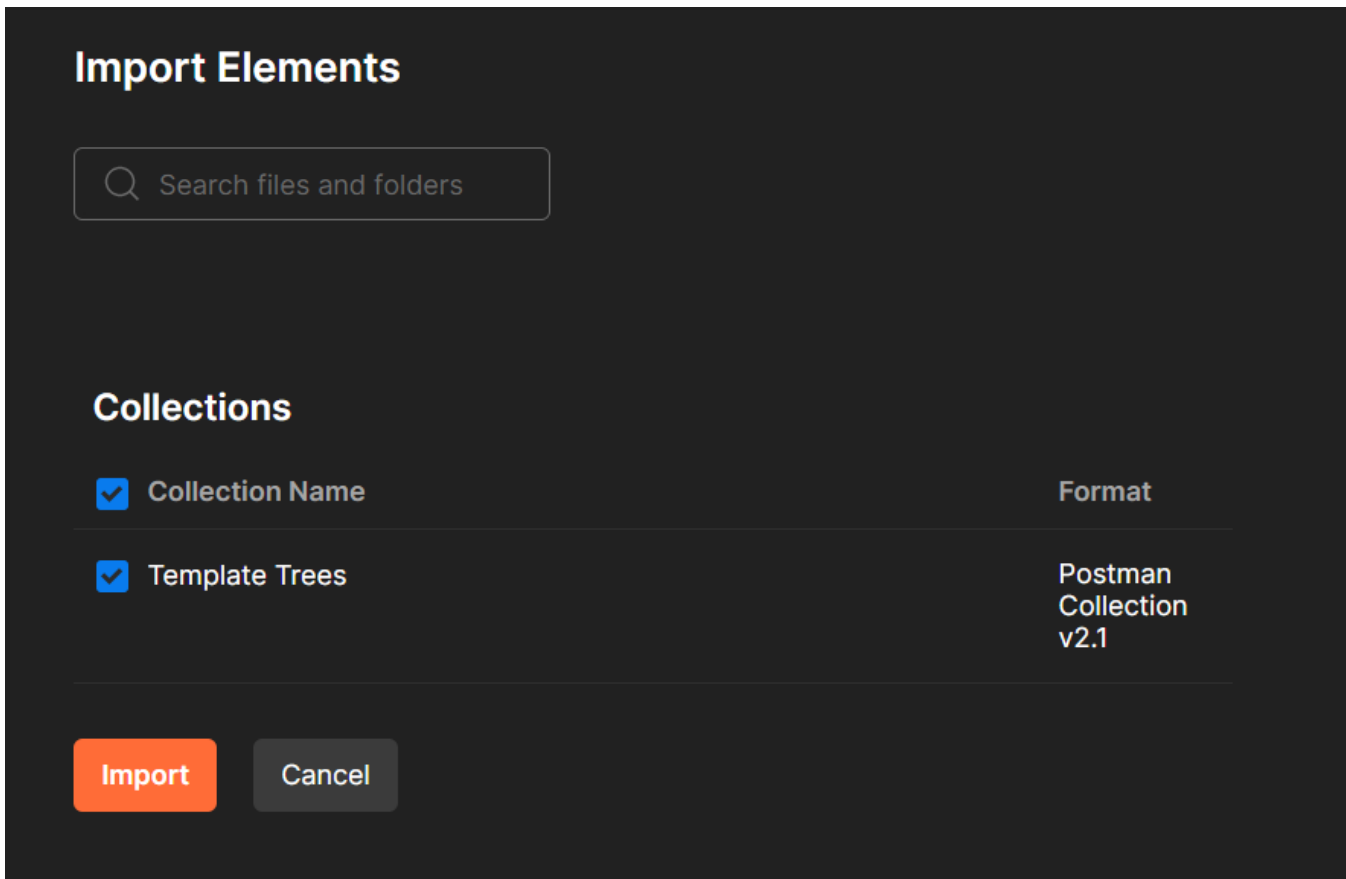

Importing the Collection by selecting Import in the “My workspace” header.

Select the file from the location on your device and Import the Collection.

IMPORTANT: All the Elements will be imported during this process.

Authentication

Authentication involves sending a verified username and password with your request. In the request Authorisation tab, select Bearer Token from the Type dropdown list.

Enter your Connect API username and password in the Username and Password fields. For extra security, store these in variables.

Example below:

1. Click on the “**Authenticate**” tab and perform the below checks before you hit the “**Send**” the request for successful authentication:

- a. Authorization:

- I) Type – Bearer Token
- II) Token – {{token}}

- b. Body:

```
{
  "username": "",    [Connect API Username]
  "password": ""    [Connect API Password]
}
```

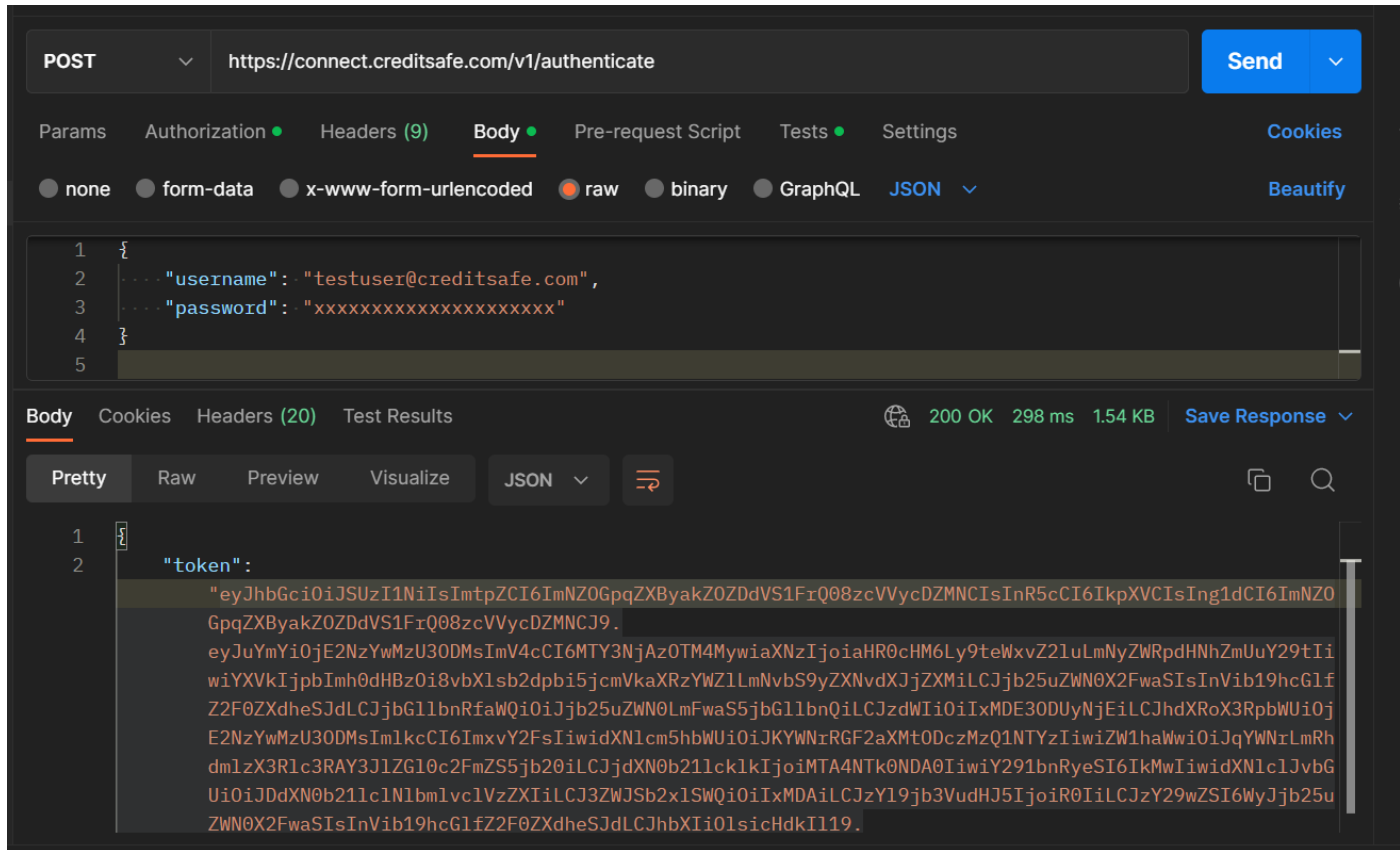

c. Tests:

```
var jsonData = JSON.parse(responseBody);
```

```
pm.globals.set("token", jsonData.token);
```

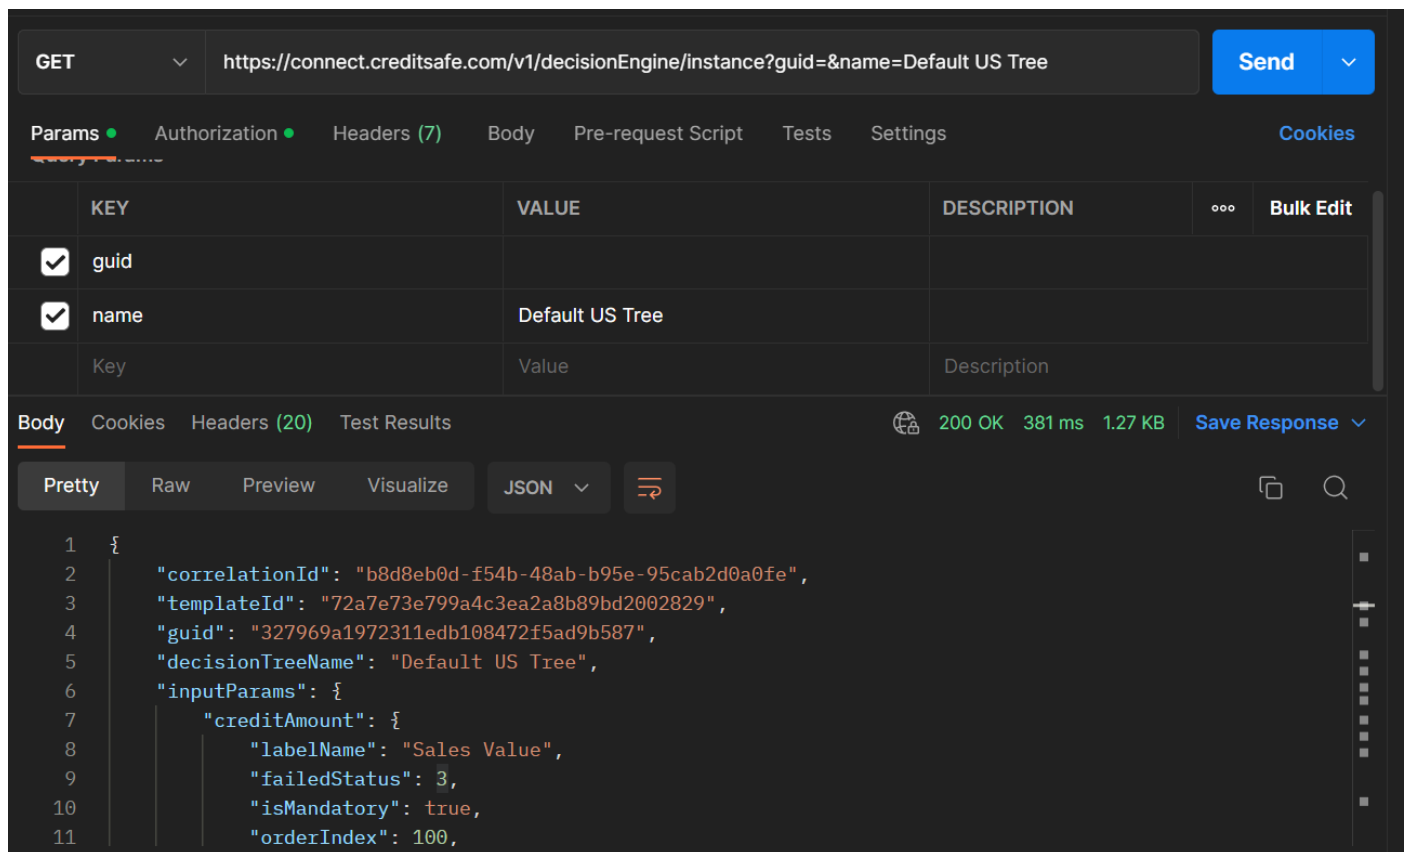

2. Once the above checks are complete, hit the **“Send”** button to generate your token.

Fetch your Decision Configuration

GET methods are typically for retrieving data from our Connect API. You will need to pass either the GUID or the Name (Decision Tree Name from the Configuration Form) parameters.

Click on the “Send” button to fetch your Instance configuration.

GET ▼ <https://connect.creditsafe.com/v1/decisionEngine/instance?guid=&name=Default US Tree> Send ▼

Decision Making

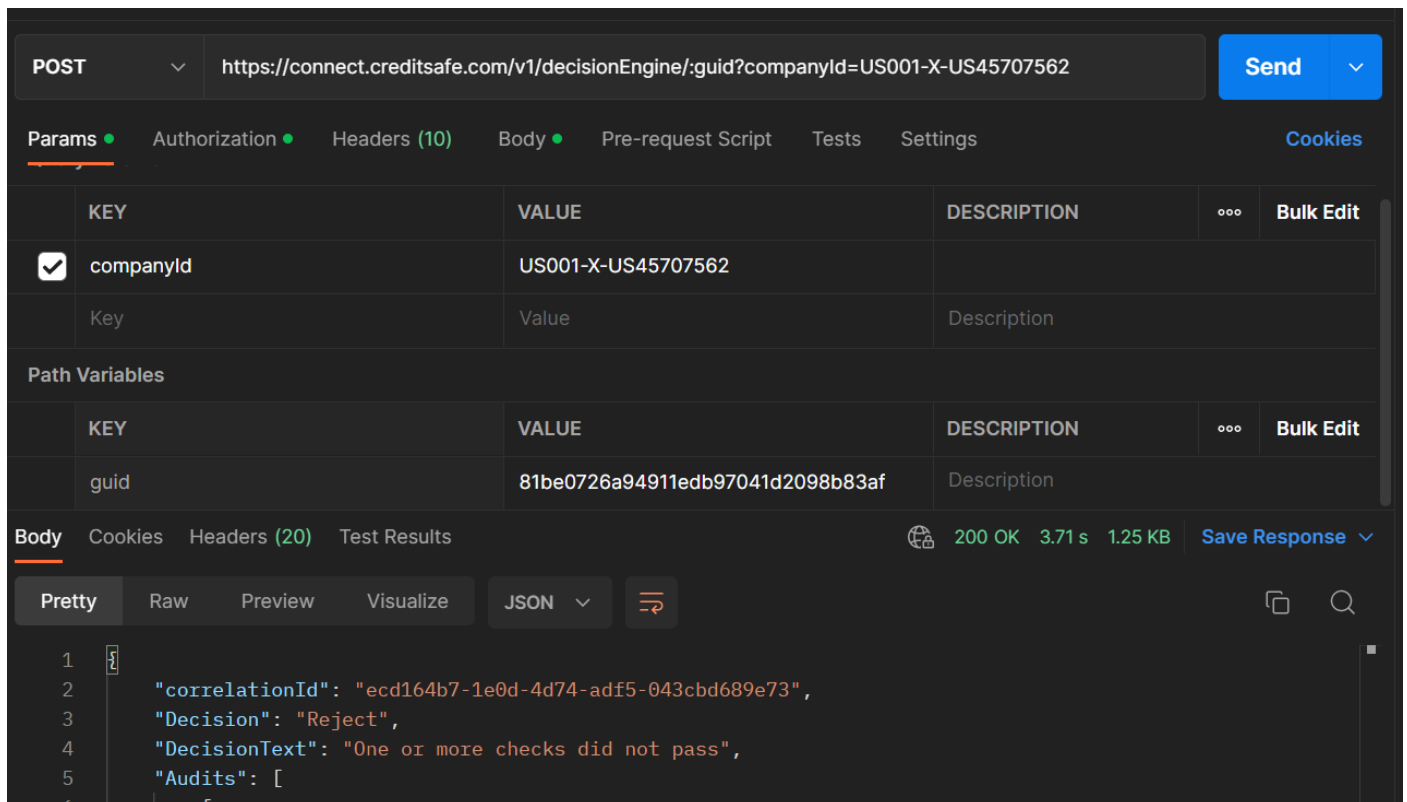

1. Click on the “Decision Making - Connect” tab and perform the below checks before you hit the “Send” request to make the decision.

- Paramaters – add a new key called **companyId** : pass the company id on which you wanted to request decision.
- add a new key called **guid** – pass the guid that we have got from the response on GET method for your instance.
- Body – Add the Body as below (ignore if already available)

```
{
  "creditAmount": "This is the user input that we have to pass while requesting for decision"
}
```

2. Once the above checks are complete, hit the “Send” request to request for decision and you will have the JSON response that has individual outcome of the checks and the final outcome (Decision).

IMPORTANT: Please note that the final outcome will be the worst outcome out of all the checks made. The Decision Text will be empty if the final outcome is Accept.
